

### St. Thomas More Church Hospitality Furniture

**Project Description:**

Many churches are cluttered by all the additional and necessary paper items that are necessary for communication with the parishoners and detract from a clean Narthex and clean Worship Space. The intent of the kiosks above was to provide furniture for storage and the return of the song sheets as parishoners left the Worship Space. Their neutral color and rounded shape allows them to visually recede but be located within the main circulation routes so they are located where most needed.

The benches within the Narthex provide a quick seat for waiting parishoners and in their simplicity allow the floor plane and view outside to remain the dominant qualities of the Church Narthex.
